

Data Enrichment Solutions

With Rise Analytics' Data Enrichment solutions, your credit union will be able to increase precision and identify and mitigate risk. Empowering data-driven decisions at your credit union.

Data Enrichment Solutions

Credit Score Update (Soft Pull Solution)

Identify changes in credit risk and portfolio risk composition.

Real Estate and Automobile Collateral Valuation

Accurately measure exposure and potential losses by analyzing current property values and senior mortgage positions on junior liens.

Benefits of Data Enrichment

Increase Precision of Scenario Analysis and Stress Testing

- Understanding your current credit scores and collateral positions is vital in quantifying how you'll be impacted by changes in the macroeconomic environment.

Identify Risk – Collections Prioritization

- Identify the differences between habitual late payors and truly high-risk loans and prioritize them in your collections system.

Mitigate Risk – High Risk Lines of Credit

- Identify relationships that have experienced material changes in credit and collateral risk, quantify the exposure and consider taking action to mitigate risk.
