

# Analytics Services

Experience a full end-to-end journey with confidence by leveraging Rise Analytics Services. We understand the unique challenges credit unions face in becoming data-driven organizations – by partnering with us, you can trust that we understand common pitfalls and can help your credit union avoid them.

## Strategic Data Analytics Plan

Improve your credit union's return on platform investment and reduce risks and blockers to achieving success with the Strategic Data Analytics Plan.

### Use this solution to:

- **Identify where you are today.** Analyze the current state of your credit union's data.
- **Plan for your ideal future.** Start designing your ideal data environment.
- **Understand ROI Opportunities.** Enable prioritized use cases and initiatives to deliver value.
- **Achieve alignment towards goal.** Make sure all your stakeholders are aligned with your goal.
- **Create your roadmap.** Build a high-level strategy to be a data-driven enterprise.

## Benefits of the Strategic Data Analytics Plan

- Improve your return on platform investment.
- Improve enterprise-wide platform adoption.
- Increase business value derived from platform implementation.
- Reduce risks and blockers to achieve success.

# Adoption & Enablement Program

Empower your data analytics employees with Rise's Adoption & Enablement Program. Create even more value by adding a Center of Excellence, which empowers the organization to build self-sufficient analytics capabilities.

## Use this solution to:

### Deliver role-based training

- Access training for roles necessary for successful data and analytics execution.
- Ensure everyone is speaking the same language through data literacy and storytelling training.

### Establish a Center of Excellence.

- Establish and govern data analytics processes and assist the business/learners with execution.

## Benefits of the Adoption and Enablement Program

- Improve platform ROI and repeatable business value.
- Drive enterprise-wide adoption and culture.
- On-board and train data analysts and workers.
- Increase data analytics capabilities organization wide.
- Enable self-service analytics and solution delivery.
